

Hack to Crack 2.0: Event Report

1. Introduction

Hack to Crack 2.0, a national-level 36-hour hackathon, was organized on March 20-21, 2025, at Vishwaniketan's Institute of Management, Entrepreneurship, and Engineering Technology (iMEET) by Department of CSE(AI&ML) in Mumbai Maharashtra. This edition brought together the brightest minds from across the country to collaborate, innovate, and solve real-world problems. With cutting-edge projects and groundbreaking solutions, Hack to Crack 2.0 showcased the future of technology.

The event saw enthusiastic participation from over 400 participants across 100 selected teams, representing more than 7 states, including Karnataka, Rajasthan, Uttar Pradesh, Tamil Nadu, Andhra Pradesh, Madhya Pradesh, and Maharashtra. With participants from 50+ colleges across 25+ cities, Hack to Crack 2.0 achieved remarkable success. Boasting a total reach of 82.2K and over 950+ registrations from 300+ colleges, the event surpassed expectations, fostering innovation and driving technological progress.

2. Objectives

The key objectives of Hack to Crack 2.0 were:

- Innovation: Encourage students to solve real-world problems through technology.
- Collaboration: Provide a platform for participants to network, exchange ideas, and collaborate.
- Industry Exposure: Connect students with mentors, industry experts, and corporate leaders.
- Learning: Offer hands-on experience in problem-solving and coding under pressure.
- Recognition: Reward outstanding solutions through awards, internships, and incubation opportunities.

3. Event Overview

- Event Name: Hack to Crack 2.0
- Date: March 20-21, 2025
- Duration: 36 Hours
- Venue: Vishwaniketan iMEET, Mumbai Maharashtra
- Participants: 400+
- Total Teams: 100+
- Colleges Represented Offline: 50+

- State Represented: 7+
- Cities Covered: 25+
- Total Reach: 82.2K
- Total Registrations: 952 Participant
- Selected Teams: 100+
- Tracks:
 - AI/ML
 - Web3 & Blockchain
 - Sustainability
 - EdTech
 - Student Innovation
 - Healthcare

4. Organizing Team

Hack to Crack 2.0 was meticulously organized by the dedicated student association of the Department of Computer Science and Engineering (Artificial Intelligence & Machine Learning). The association, comprising passionate and enthusiastic students, played a pivotal role in planning, coordinating, and executing the event. From conceptualizing the hackathon's theme and managing logistics to collaborating with sponsors and facilitating participant engagement, the organizing team ensured a seamless experience.

Fig 1: Hack To Crack 2.0 Organising committee

5. Event Phases

5.1. Planning Phase

The planning phase commenced six months prior to the event. It involved:

- Defining problem statements in collaboration with industry experts.
- Securing sponsorships and partnerships.
- Designing the hackathon format and tracks.
- Recruiting judges and mentors.
- Promoting the event through various channels.

5.2. Registration Phase

The registration opened on 21st January 2025, attracting entries from across the country. Participants registered through our platform partner unstopp. The selection was based on:

- Problem-Solving Skills
- Innovation Potential
- Technical Knowledge
- Team Collaboration

Out of 363 teams applications, 100 teams were shortlisted to participate.

5.3. Hackathon Phase

The Hackathon commenced on March 20, 2025, with an inspiring inaugural ceremony. We were honored to have **Mr. Rajesh Bapusaheb Chougule**, a visionary leader and social entrepreneur, as the Chief Guest. As the Founder and Managing Director of multiple companies and a dedicated advocate for social welfare, his presence added immense value to the event.

Dr. Munir Sayyad, Vice President at Reliance Jio and leader of the 5G/6G & AI Innovation Labs, graced the occasion as the Guest of Honour. With 25 years of experience, 6 international patents, and numerous publications, Dr. Sayyad's insights further enriched the event.

Following the inauguration, participants enthusiastically moved to their workstations, ready to take on the 36-hour challenge and bring their innovative solutions to life.

- Mentoring Sessions: Industry mentors provided valuable guidance.
- Networking Opportunities: Participants connected with industry leaders.

5.4. Evaluation Phase

The projects were evaluated based on:

- Innovation
- Technical Complexity
- Functionality
- User Experience
- Impact and Feasibility
- Presentation and Demo

A panel of experienced judges from academia and industry selected the winners.

Panel 1: AI & ML

Dr. Sunil Mane (COEP Pune)

Mr. Vikas Gaikwad (VP, Citi Bank)

Panel 2: Student Innovation

Dr. Madhav Chandane (VJTI)

Dr. Gopal Upadhye (VIT Pune)

Panel 3: EdTech

Mr. Gaurav Patil (Tech Mahindra)

Dr. Vikrant Agaskar (Vidyavardhini, Vasai)

Panel 4: Healthcare

Dr. Jinesh Melvin (Pillai College)

Mr. Pankaj Suryawanshi (TCS)

Panel 5: Sustainability & Blockchain

Dr Subhash Pingale

Mr Vikas Thombre

5.5 Valedictory session

The Valedictory Session of Hack to Crack 2.0 was honored by the presence of Dr. Sandeep Joshi, Principal of Pillai College of Engineering, Panvel, as the Chief Guest, along with Dr.

Sandip Inamdar, Vice President of Vishwaniketan. Their inspiring words encouraged participants to pursue innovation and excellence. Dr. Joshi commended the creativity and dedication displayed by the teams, while Dr. Inamdar provided valuable guidance, making the session a memorable conclusion to the event.

6. Sponsors and Partners

Hack to Crack 2.0 was supported by leading companies and organizations.

- Sponsors:
 - Aptech
 - Markscape
 - RCF Chemicals
 - RKDemy
 - 0x Day
 - IIIT PRO

7. Track Overview and Problem Statements

Artificial Intelligence & Machine Learning (AI/ML):

- Develop a chatbot for mental health support that can identify user emotions and provide supportive responses based on a predefined knowledge base. (AI/ML001)
- Build an AI-powered recommendation system for farmers to select optimal crops based on soil type, weather conditions, and market demand. (AI/ML002)
- Design a machine learning model to predict and mitigate the risk of natural disasters like floods, earthquakes, or wildfires using satellite imagery and sensor data. (AI/ML003)

Web3 and Blockchain:

- Create a blockchain-based voting system to ensure secure, transparent, and tamper-proof elections. (W/B001)
- Develop a decentralized platform for tracking the supply chain of medicines to combat counterfeit drugs. (W/B002)
- Implement a smart contract-based solution for dynamic carbon credit trading, incentivizing industries to adopt sustainable practices. (W/B003)

Sustainability:

- Design a WebApp that helps users calculate their daily carbon footprint and provides tips for reducing it. (SS001)

- Build a platform that connects local communities with excess food to nearby NGOs or shelters to reduce food wastage. (SS002)
- Create a real-time water quality monitoring system using IoT and AI for lakes and rivers, with actionable insights for government agencies. (SS003)

Education Technology (EdTech):

- Create a gamified learning app for kids to improve their math and reading skills with interactive exercises. (ET001)
- Develop an AI-powered tool that generates personalized study plans for students based on their learning speed, preferences, and strengths. (ET002)
- Build a blockchain-based platform for issuing, verifying, and sharing academic credentials securely and globally. (ET003)

Healthcare:

- Develop a telemedicine platform for connecting rural patients with doctors for online consultations and prescription generation. (HC001)
- Create a system to predict and monitor early symptoms of chronic diseases (like diabetes or hypertension) using wearable devices and AI. (HC002)
- Build a blockchain-powered electronic health record (EHR) system that ensures data privacy and allows seamless data sharing between hospitals. (HC003)

Student Innovation:

- Students are welcome to bring their own problem statement but it should be solved the real world problem(Student Innovation)

8. Winners and Awards

1st Prize Winner

Team VisionCreators from VESIT, Mumbai, and TSEC, Mumbai, developed SmartCare, an innovative solution for paralysis patients. It uses eye tracking for quadriplegics, joysticks for monoplegics and paraplegics, and Hall effect sensors for diplegics. The system features path memorization for automated navigation and an Impulse Edge Model for real-time fall detection with instant alerts via Twilio. Additionally, it monitors vital signs like body temperature, SpO2, and heart rate, ensuring timely health responses. The team members Devendra Gawade, Jatin Vaity, Sankalp Shrivastava, and Ritik Pandey showcased remarkable innovation in the Student Innovation track.

2nd Place

Team Hat Squad from Bangalore Institute of Technology (BIT), Bangalore, developed a life-saving application designed to support pregnant women throughout their pregnancy journey. The project was inspired by a tragic incident where a woman lost her life on their premises due to an undetected fetal death. Determined to prevent such cases, the team created an app that provides real-time health monitoring, timely reminders, and essential guidance for expecting mothers. By promoting early detection of complications and ensuring access to medical support, It aims to safeguard maternal and fetal health. The team, consisting of Tejas H J, Navyas M.P, Dhanyashree U R, and Abhishek Rao K, showcased their commitment to making a meaningful impact in the Healthcare track.

3rd Place

Team Code Artisan from PHCET, Maharashtra, developed Kalakriti, a digital platform designed to empower rural artisans by connecting them with a global audience. The platform features virtual galleries, AI-driven recommendations, and secure e-commerce to help artists showcase and sell their work. It offers skill development programs, live events, and AR-

powered previews for a more immersive experience. By bridging the gap between traditional craftsmanship and modern technology, The team, comprising Soham Patil, Simran Dhole, and Aditi Pawar, demonstrated exceptional innovation in the Student Innovation track.

Special Category Awards

Best Innovative

Team Mahadev's created an AI-powered Smart Agriculture Recommendation System to help farmers make informed crop decisions based on soil type, weather, and market demand. Using machine learning, IoT sensor data, and predictive analytics, it maximizes yield, reduces risks, and promotes sustainable farming. The team, comprising Ayush Duseja, Sahil Ahuja, Darshan Kakad, and Vineet Chelani, won the Best Innovative Project award.

Best UI/UX Design

Team Hydro Verse from RGUKT Nuzvid, Andhra Pradesh, developed an intuitive and visually engaging platform to predict natural disasters and suggest effective mitigation strategies. Leveraging AI and ML, the system provides real-time insights with a user-friendly interface that ensures seamless navigation and accessibility. The clean design and interactive features offer a smooth user experience, making complex data easily understandable. The team, comprising Gopi Jagadheesh Mahamkali, Pooja Ratna Sai Sri Teku, Raghu Goddumuri, and Revathi Gugulothu, received the Best UI/UX Design award.

Best Technical Implementation

Team Tech Hunters from IIIT Dharwad developed a Web3 Carbon Credit Trading System that leverages blockchain, AI, and ML to create a secure and transparent marketplace for carbon credits. By eliminating intermediaries and ensuring verifiable offsetting, the platform promotes sustainability. Tokenized credits offer real-time accountability, while AI-driven insights help businesses make eco-friendly decisions. The team, consisting of Vishesh Dwivedi, Yashpreet Singh, and Mohana Krishnan, earned the Best Technical Implementation award.

Domain Winners

AI&ML

Team 4x4 from DJSCE, Mumbai, and RAIT, Navi Mumbai, developed an Agriculture Crop Recommendation system using AI & ML. The project provided farmers with data-driven crop suggestions, promoting sustainable farming. The team members Rajat Masanagi, Devam Desai, Preitish Fondevkar, and Kumar Aadarsh were awarded the Domain Winner title.

Blockchain

Team The Shield from CIT, Chennai, developed a Blockchain-based Voting System ensuring secure, transparent, and tamper-proof elections. By recording votes on the blockchain, the system guarantees fairness and trust. The team members Tarun T, Vishnu A, Sai Arevinth Raaj B, and Gokul Vijayanand earned the Domain Winner title.

Sustainability

Team Galaxy from Xavier Institute of Engineering, Mumbai, developed a Food Rescue Platform using Map API to optimize rescue routes, reduce transportation costs, and maximize community benefits. By redirecting food nearing expiry to those in need, the platform promotes sustainability and reduces food waste. The team members Jayesh Chaurasia, Parth Lagishetty, Ajay Kumbhar, and Kshitij Khot earned the Domain Winner title.

EdTech

Team Infinity Loop from IIIT Kota developed an Interactive Learning Platform that transforms education into an engaging adventure through gamified lessons, videos, puzzles, and real-world discovery using the Image Detective feature. A comprehensive dashboard with progress analytics and a chatbot keeps parents informed, ensuring a joyful and stress-free learning experience. The team members Anmol Upadhyay, Vikas Kumar, Sauvir Wodehra, and Adarsh Dubey earned the Domain Winner title.

Healthcare

Team Code Zero from DSCE, Bengaluru, developed a Blockchain-Based Electronic Health Record System using Ethereum Sepolia in a hybrid model. Medical documents are securely stored off-chain, with hashed URLs recorded on the blockchain for enhanced security and efficient storage. The team members Sathwik Shetty, Ritvik K, Khushbu R, and Shreyas earned the Domain Winner title.

Student Innovation

Team NAT from TIT, Bhopal, developed a QR-Less Payment System, offering a revolutionary way to make payments and access location-based information without the need for QR codes. Designed for cafes, restaurants, businesses, and toll tax payments, the system ensures fast and seamless transactions. The team members Ayush Kumar, Raman Lodhi, Lohitaksha Rawte, and Krishna Nema earned the Domain Winner title.

Student Innovation Runner-Up

Team Delta from Lokmanya Tilak College of Engineering, Navi Mumbai, developed an AI-powered Farmer Assistance Platform offering personalized scheme recommendations, real-time market insights, and voice-based support. It simplifies access to government benefits, modern farming techniques, and subsidy eligibility checks, empowering farmers to make informed decisions. The team members Ritesh Singh, Siddhesh Gupta, Raj Parihar, and Nitesh Yadav secured the Runner-Up position in the Student Innovation category.

10. Hack To Crack In Picture

10. Cultural Event

The cultural night on March 20, 2025, added a vibrant touch to the hackathon. Participants enjoyed live music, dance performances, and interactive sessions, enhancing the networking experience.

11. Feedback and Testimonials

Participants and mentors praised Hack to Crack 2.0 for its well-structured format, problem diversity, and valuable mentorship. Here are a few testimonials:

- *"Hack to Crack was an amazing experience. The mentorship and technical guidance were invaluable." – Ritik Swaraj, Participant*
- *"We were impressed by the quality of ideas presented. The enthusiasm of the students was remarkable." – Judge*

🚀 We are the WINNERS of the Web3/Blockchain domain at the [Hack To Crack 2.0](#) held at [Vishwaniketan Institute of Management Entrepreneurship and Engineering Technology \(iMEET\)](#), Maharashtra- A National-Level Hackathon! 🎉🎉

This journey has been nothing short of amazing! 🌟 A huge shoutout to my incredible team [Sai Arevinth Tarun Thimmayan Gokul V](#) for their dedication and hard work. Special thanks to our HOD [Dr. Pavithra Sankarappan](#), [Dinesh Dinakaran](#) sir and [Dr. Prasina Sathish](#) and [Biju Balakrishnan](#) sir 🙏 and my college, [Chennai Institute of Technology](#) for their constant support and guidance.

Grateful to the organizers [Sachin Chaurasiya](#) for providing this fantastic platform to innovate in the Web3 space 🚀. This is just the beginning—excited for what's ahead! 🚀

#HackathonWinner 🎉 #Web3 🚀 #Blockchain 🌟 #Innovation 🚀 #Teamwork 🤝
🤝 #Gratitude 🙏

🚀 Hackathon. Innovation. Teamwork. ORBITED! 🎮📚

Thrilled to share my unforgettable experience at Hack to Crack – a National-Level Hackathon in the EdTech domain! In just 36 hours, my team and I built Orbited – a gamified learning app designed to revolutionize how kids (ages 4-12) develop math and reading skills!

💡 The Idea Behind Orbited

We wanted to create a fun, immersive, and interactive learning experience that goes beyond traditional education. Orbited blends AI, AR, and game mechanics to engage young learners through challenges that force them to think, operate, and explore while having fun!

🎮 Key Features of Orbited:

- ✓ 4 Interactive Learning Games – Story Puzzle, Phantom Spellers, Number Ninja, and Math Frenzy
- ✓ Adaptive Learning Levels – Age-based difficulty for kids aged 4-12
- ✓ AI Tutor – Assists kids with academic queries
- ✓ AR Hunt – Real-world object scanning for interactive challenges
- ✓ Real-Time Feedback & Rewards – Keeping kids engaged & motivated

🛠 Tech Stack:

- 📱 Flutter – Smooth & interactive UI/UX
- 🔥 Firebase – Backend, authentication & real-time sync

🤝 Teamwork at Its Best!

From brainstorming innovative ideas to debugging complex code, every challenge pushed us beyond our limits. The collaboration, energy, and creativity of my team

🚀 Full Circle Moment: From Organizer to Mentor! 🎉

I had the incredible honor of being invited as a mentor at the National Level Hackathon – Hack to Crack 2.0, held on 20 - 21 March 2025 at Vishwaniketan College, organized by the amazing SAAM committee (Student Council, AIML Dept, ViMEET).

This 36-hour non-stop coding marathon brought together nearly 400 brilliant minds, 101 teams from across India – a melting pot of ideas, innovation, and insane energy! 🔥

As a mentor, I got the opportunity to guide multiple teams during their project development journey, troubleshoot roadblocks, and most importantly – witness the spark of innovation up close.

What made this even more special? I was the Lead Organizer for Hack to Crack 1.0 – so seeing this initiative evolve and grow to this scale was truly fulfilling. 🙌

A huge shoutout to:

- 💡 **Dr. Ankush Pawar** Sir, HOD, for his unwavering support.
- 🔥 **Sachin Chaurasiya** Lead Organizer of Hack to Crack 2.0 – and a key teammate from 1.0 – for carrying the legacy forward like a champ.
- 🌟 **Pratham D., Aniket Suryawanshi, Shreya Auti** - who were also part of the 1.0 team and contributed greatly once again while mentoring juniors and leading by example
- 👉 The entire **Hack To Crack** 2.0 Team & SAAM Committee – your hard work showed in every detail.
- ❤️ The dedicated AIML faculty members – thank you for the constant support.
- 👉 And to all the students and even the parents I got to interact with – you all made this an unforgettable experience.

My team and I recently participated in **Hack To Crack** 2.0, organized by ViMEET on 20th & 21st March 2025, and it was an incredible learning experience. 🎉

🚗 What did we build?

We developed CarPark, a smart parking management system that helps users find and book parking slots in real-time. The goal? To reduce parking congestion, save time, and provide a seamless parking experience with secure online payments.

🔍 How does it work?

Users can search for available parking slots within a 5-kilometer radius 🚗, view real-time availability 🚗, and book slots instantly. Our system generates a QR code for easy check-in and checkout. 💳 Secure payments can be made through the built-in wallet feature, and users receive a digital receipt after booking.

⚡ We have also introduced EV Charging Station Availability & Booking, allowing users to find and reserve charging slots for their electric vehicles 🚚

💰 Key Features:

- ✓ Real-time Parking Availability – Find and book parking spots instantly 🚗
- ✓ QR Code-Based Check-in & Payments – Hassle-free transactions 💳
- ✓ Built-in Wallet – Add money and make quick payments 💰
- ✓ Digital Receipts – Get instant proof of booking 📲
- ✓ EV Charging Station Booking – Locate & reserve charging slots for electric vehicles ⚡ 🚚
- ✓ User-friendly Interface – Simple and intuitive design 🌐

A huge thank you to ViMEET, **Dr. Ankush Pawar**, Dr. B.R. Patil, **Sachin Chaurasiya** and the entire organizing team of Hack To Crack 2.0 for creating such an engaging and competitive platform! 🌟

Competing against 250+ teams nationwide, we pushed our limits, innovated and developed product! A huge shoutout to my amazing team NagShakti:

🚀 Honored to Volunteer at Hack to Crack 2.0!

I had the incredible opportunity to volunteer at **Hack To Crack** 2.0, a 36-hour national-level hackathon hosted at

Vishwaniketan Institute of Management Entrepreneurship and Engineering Technology (iMEET)

As part of the Student Innovation domain, I assisted the judges in evaluating 36+ teams, witnessing groundbreaking ideas, creativity, and problem-solving in action. The dedication and innovative mindset of the participants tackling real-world challenges were truly inspiring.

A heartfelt thank you to **Sunita Jadhav** ma'am for giving me this opportunity and believing in my abilities. Your guidance and trust truly meant a lot. I would also like to express my gratitude to **Dr. Ankush Pawar** sir for their constant support and encouragement throughout the event.

It was amazing to see brilliant minds come together, collaborate, and push the boundaries of technology and innovation. Looking forward to many more such experiences that foster learning and growth!

🚀 From Zero to Champion: Winning Hack to Crack 2.0 in Healthcare with Blockchain! 🏆

Our team **Code Zero** Diving into blockchain at a national-level hackathon with absolutely no prior experience was a bold move, but we took on the challenge at Hack to Crack 2—and guess what? We won the Best Project in the Healthcare Domain! 🎉

Taking on the dual role of ML Engineer, Full-Stack Developer, and DevOps in a hackathon for the first time was no easy task. Managing both was intense, but the journey was worth it! A huge shoutout to **Khushbu R Hajari** for making my job easier with the frontend, **Sathwik Shetty** for managing the backend efficiently, and **Shreyas Kulkarni** for guiding me through the ML aspects.

🚀 Exciting experience alert!

Recently, my team and I participated in our very first hackathon — **Hack To Crack** 2.0 a 36-hour national-level hackathon at

Vishwaniketan Institute of Management Entrepreneurship and Engineering Technology (iMEET)

! 🌟 As the team leader, I had the opportunity to step up, make decisions, and grow in confidence along the way. While we didn't win, we gained something far more valuable—new skills, fresh perspectives, and an experience we'll never forget! 💪✨

This journey reinforced the power of teamwork, problem-solving, and self-belief. Grateful for everything we learned and excited for many more challenges ahead! ✨

"'Hack to Crack 2.0' **Hack To Crack** 2.0 was successfully organized by the AIML department of ViMEET College,

Vishwaniketan Institute of Management Entrepreneurship and Engineering Technology (iMEET)

Khalapur. The event drew participants from various states and colleges, showcasing their skills in diverse domains like Blockchain, AIML, and more.

The event featured a total prize pool of ₹3 lac. Renowned judges and dignitaries, including Dr. Sandeep Inamdar (Managing Trustee, ViMEET College), Dr. Sandeep M. Joshi (Principal, Pillai Panvel), and Dr. Ankush Pawar (HOD, AIML Department), graced the occasion.

Special thanks to the Vishwaniketan College 'Hack to Crack' team , thanks to Pratham , Shreya & other lovely team members and the AIML Department for facilitating Ms. Anuja Patil (Director, Aptech Panvel) and Mr. Gaurav Munj (ASM, Aptech Ltd)."

🌟 From Competing for the First Time to Winning a 36-Hour National-Level Hackathon! 🌟

I am beyond thrilled to share that I & my Team recently competed in **Hack To Crack** 2.0, a prestigious 36-hour National Level Hackathon at

Vishwaniketan Institute of Management Entrepreneurship and Engineering Technology (iMEET)

, competing against 800+ brilliant tech minds, this journey was an electrifying rollercoaster of problem-solving, teamwork, and non-stop coding! 🚀

My first ever hackathon win!

🔥 Driving Innovation 4x4 Style – Victory at Hack to Crack 2.0! 🔥

Absolutely thrilled to share that Team 4x4 secured 1st place in the AI/ML domain at [Hack To Crack](#) 2.0, organized by [Vishwaniketan Institute of Management Entrepreneurship and Engineering Technology \(iMEET\)](#)!

Our problem statement? Smart Crop Recommendation System 🌾💡

We tackled this by leveraging:

- ◆ Soil health data (NPK levels, pH, organic matter) to assess fertility
- ◆ GIS data for precise geospatial insights
- ◆ Weather patterns to predict optimal growing conditions
- ◆ Market trends to ensure profitability for farmers

Competing against 250+ teams nationwide, we pushed our limits, innovated, and emerged victorious! A huge shoutout to my amazing teammates:

- ◆ Rajat Masanagi
- ◆ Aadarsh Kumar
- ◆ Devam Desai

Couldn't have done it without you all! Here's to more innovation and impact ahead!

Proud to Represent Team Nakshatra at a National-Level Hackathon!

What an exhilarating experience! Being part of a 36-hour national-level hackathon with Team Nakshatra was an unforgettable journey. Out of thousands of applicants, 250 teams from 14 states were selected, and we were honored to be among them. The competition was fierce, the energy was unmatched, and the innovation was at its peak!

Working alongside my brilliant teammates [Rohit Gupta](#), [Kamraan Mulani](#) and [Afraz Hussain](#) we pushed our limits, brainstormed tirelessly, and built something we were truly proud of. Though we didn't take home the win, the knowledge gained, the challenges tackled, and the problem-solving mindset developed were the real victories!

A huge shoutout to [Sachin Chaurasiya](#) and [RAJ TRIPATHI](#) for organizing such a flawlessly executed event. The entire experience was a testament to how tech, teamwork, and creativity can come together to create something extraordinary. Every challenge is a stepping stone to growth, and this hackathon has only fueled our passion for technology and innovation even more! Excited for the next adventure!

- ◆ Key Takeaways:
- ✓ 36 hours of non-stop coding, brainstorming & execution
- ✓ Competing with the best minds across the country
- ✓ Learning from setbacks & pushing creative boundaries
- ✓ Building resilience, teamwork & problem-solving skills

12. Conclusion

Hack to Crack 2.0 was a resounding success, providing a platform for innovation and collaboration. The event not only celebrated technological advancements but also fostered connections between students, mentors, and industry leaders.

We extend our heartfelt thanks to all participants, sponsors, mentors, judges, and volunteers who contributed to the event's success. We look forward to continuing this tradition of innovation and excellence in Hack to Crack 3.0!
